DUNGEONS AND DRAGONS

If you like Fantasy, swords and sorcery, evil monsters, and epic battles, Dungeons and Dragons is the game for you. In the game you become a character with a name, race, money, and entire personality, not just a plastic

marker that is typical of most other games. That character which you create entirely goes on a mission, usually in the dark depths of a dungeon, to find treasure and adventure. The game has no board to move playing pieces around on, instead, a type of referee to the game known as the Dungeon

Master, describes what your character sees and the players map their way through the dungeon on graph paper. This may seem difficult to understand, but the easy to understand instruction booklet makes it simple. Most of the game items are expensive, unfortunately, but if you play it once you will be hooked. The Basic Set which gives you everything you need to start playing is at most toy stores and game shops. So, travel back to medievil days; play a game of Dungeons and Dragons!

THE BATTLE Part 3

The ship moved steadily forward. As it did, the planet moved farther away. Then, all of a sudden, a laser bolt came from nowhere! Then another! The ship was pinned down.

Max set the ship on red alert. Then, it happened. The ship was hit. Max rushed to the control board for the damage report. Unfortunately, the damage was severe. What was Max going to do?

S.F. STORY

"WARP" Part 5

The S.W.A.T. team suddenly appeared in the suspension region to which the nurse had been transported before. "Gentlemen, make yourselves comfortable. You will be here for a while. I am finalizing the plans for my military take over."

"Take over of what?"

"The world!"

"You're a mad man! I demand that you release myself and my unit and the hospital personel who you've put God knows where."

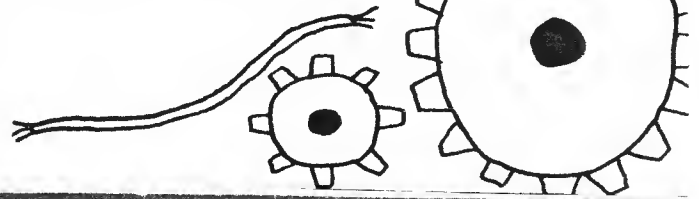

"And if I don't?"

"We'll open fire!"

"You have no choice in the matter. Even if you could open fire, which you can't because your wills are controlled by me, what would you shoot at? I am only a voice. I am afraid you are under my power."

The captain cursed under his breath and sat, silently pondering his fate.

CIRCUITS AND GEAR

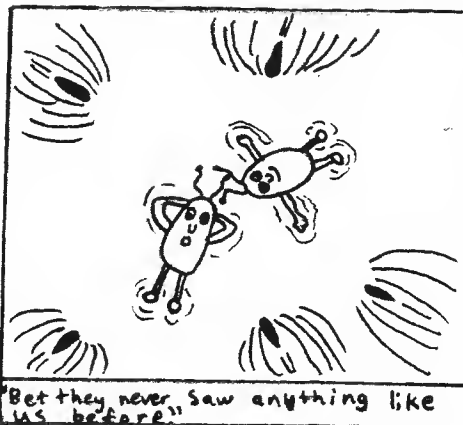

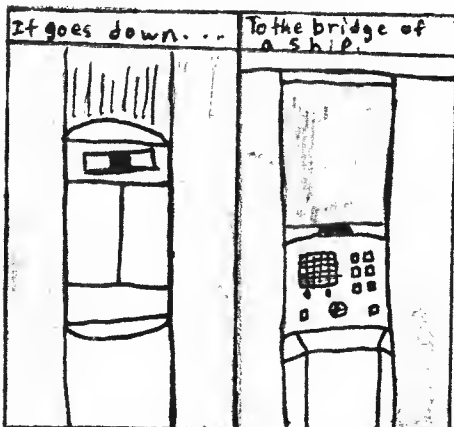

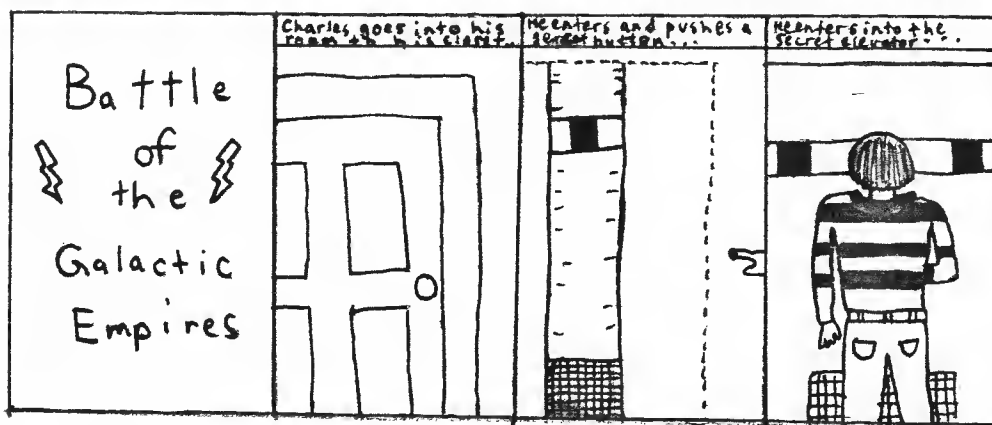

BITS OF SCIENCE FICTION INFORMATION

2 movies have been released this month. They are Scanners, a movie where aliens make people's minds explode, and Excalibur, a movie about King Arthur and his knights and the sword named excalibur. Both of these movies are rated R.

* * * * *

There has been another movie this month on T.V. It is called Fugetive From the Empire. It is about a man who was banished from his empire for supposedly killing his father. He then goes out to find a magician named Azersaw. He uses a magical heart bow named Elb to help him find Azersaw. There will be 5 more of these movies on T.V. The next one is scheduled for June.
